When ever i start up renegade, the renguard pops up like normal, but its blank and then it says:
Failed to reciecv e a list of available master servers. check your internet connect.

But, the problem is my internet is just fine, because i played just fine after i bypassed it. I just need
renguard to play on the server so i don't get kicked.

Can you help me with this?

Thanks

I fixed the problem, it was my retarded firewall.

Thanks anyway!
