`ftp://ftp.westwood.com/pub/renegade/updates`

You can download the update manually there /|\

oh good catch danpaul, he is talking about windows.

goto "Control panel ~ Administrative Tools ~ Services"

There you will see "Automatic Updates" Double-click and set to stop.

you could also try visiting www.windowsupdate.com to download the updates manually, it might fix the auto-updater for you.

he said "i shut automatic updates off", holy shit dude

apart from that, the error has nothing to do with automatic updating.
