When you get a chance, click on option and check "Disable core updates" and click OK. Then restart RenGuard.

You made sure to install v1.037 of Renegade before installing RenGuard, right?

yup i dud that

but dont understand the problem i bought the game 4 years ago played last time onlyne 2 years ago but the cd isnt damaged or something never gotted 1 error and now they keep coming

by the way i uninstalled rengaurd now again only got game with gsa

get this error now

an error prevented the game from starting make sure the game is installed correct and that the path is correct

If you know someone who also has Renegade and ask him if you could use his Installation Disk

you can install the game with your CD-key, and then play the game with your own Game Disk.

Uninstall RenGuard, etc. before reinstalling Renegade.

Also, try installing into a directory with no spaces, just for kicks.
