Make it .jpg next time, it means that your Install Disc is damaged.

Have you scanned your computer for viruses (all it takes is 10 minutes on the internet and a brand new (most likely unprotected) computer will be infected with something)?

Have you installed the Renegade 1.037 patch?

- 1.Un-install RenGaurd.
 - 2.Download a No CD.(I recommend this one)
 - 3.Download here a always.dbs that is patched to 1.037.
 - 4.Reinstall RenGaurd.
 - 5.Download CP1.
 - 6.Download the latest scripts.dll and bhs.dll here.
 - 7.Onlyextract scripts.dll and bhs.dll to your Renegade folder and let it overwrite the older scripts.dll and bhs.dll.(Check if you have a scripts.dll and scripts2.dll, if you only have a scripts.dll then rename your scripts.dll to scripts2.dll.)
 8. Put your whole Renegade directory on a CD. If you have to reinstall Renegade you only have to copy the Renegade directory to your westwood directory.
