You did apply the patch before installing RenGuard or anything else, right?

just follow these steps and it should work...

install game
install patch 1.037
install rg
(disable core update)
login on wol
(enable core update)
install core patch
play it

it might happen that u get problems installing cp without logging in on wol coz rg doesnt detect a nickname, not always but it happens sumtimes... thats the secure way to get over this
