We need more information. What OS are you using? What graphics card? Are the drivers up to date? Etc.

I've had a router problem before that made me disconnect every now and then.

Yeah, the router was my problem. I did a hard reset on my Linksys router and the disconnents went away. It was funny too: at 11 minutes, 30 seconds the game would drop out on the dot (I timed it). It wouldn't, however, disconnect on one server I played on. Very weird.
