ok I was playing a game and a noob named SoQion, Say i was Using Stheal Skins Hax ... even when i was Running RG

Cauz i was scanning the area with my orca and i got him like 4 times ...

He sais i was Cheatin with Stheal Skins ..and is possible to Use this even with RG ...

There is Said .. If u r sure of this why dont u go in the RG Forums for result the Probleme ...

he said: Yes I already post the problem in the Forum ...

WTf ??? I think is just a noob right

Altough I doubt you did use any cheats.

I think I read somewhere RG doesn't block the stealth skins, so it is actually possible. They are normal skin files, and skins are useable on non-pure RG servers.

Translation time.

Before Translationok I was playing a game and a noob named SoQion, Say i was Using Stheal Skins Hax ... even when i was Running RG  
Cauz i was scanning the area with my orca and i got him like 4 times ...

He sais i was Cheatin with Stheal Skins ..and is possible to Use this even with RG ...  
There is Said .. If u r sure of this why dont u go in the RG Forums for result the Probleme ...  
he said: Yes I already post the problem in the Forum ...  
WTf ??? I think is just a noob right

After TranslationSo. . .I was playing a game with a n00b named "SoQion". This n00b claimed that I was using a modified Stealth Black Hand skin; a skin that allowed me to see all units on the field which were invisible at the given time. Even though I was running RenGuard -- which does not

allow modified skins on Pure servers -- he still accused me of this due to the fact that I was scanning the area with my Orca and wound up killing him around four times. . .  
He continued to accuse me of cheating via use of modified Stealth skins which, as I had said, is not even possible to do while you're running RenGuard.  
It was at this point that I then suggested to him, "If you are positive that I was cheating, you should visit the Official Renegade Forums and inquire about the problem." He simply replied that he had already done so, even though he apparently has not. What in the world?

Well, in my opinion, this gentleman is indeed the n00b. Do you not agree with this?

You're welcome.

Most of my kills on SBH's and STanks are when I'm scanning for impacts with my guns... that's the only really good way to find them in most cases.

Now if you "just happened" to headshot him with a n00bjet four times in a row, that would be reason to believe that you had a stealth skin... but sweeping around with a machine gun is a fairly common tactic. Especially with Orca pilots, since they have no pause for reload.

OK, time to actually answer this dude's question: there are skins out there in the wild that can make it easier to spot stealth units. As RG only blocks all skins in pure mode (which almost no server uses), those aren't blocked most of the time. If they were to be blocked, noone could use any more skin for sbh's and it frightens the RG-people that players will uninstall RG if they do so (right?).

Sometimes, doesn't hapen often but it hapens your SBH will flicker, if someones sees you then. It will be strange from the sbh's point of view because how in the hell can someone see you. Just a bug but I dont think it hapen's THAT often though.

There is skins that give a advantage, and lmo that removes the entire point of Nod having stealth, so people using that it's just sad. If you use a spider man skin or something well that's just for the fun I assume. But people using the bright skin shit, it's just wrong.

Ya know what I want? I want a Stealth skin that's exactly like the Command & Conquer: Tiberian Sun stealth effects. That's right. "Snow". I want a black/grey fuzzy effect skin. Why? Because I think it's cool. So. . . I tried doing it. All I ended up doing, however, was making things really hard to see in light areas and really easy to see in dark areas. . . I tried fiddling with the skin further, but I didn't have much luck. Oh well. . .

Well, I can't say that I've made the skin I wanted. . . However, I did manage to make this. It really is pretty, and it's not really all that much brighter than the normal Stealth skin. . . I think I'll make this my normal Stealth skin from now on, unless I'm playing in a Pure server. If anyone claims it makes Stealthed units more visible, then I'll shrink it down to half size(though I'd prefer not to, considering how pretty it looks as it is. It's an all-around win situation, really.

Also, I never should'a found that PhotoShop DDS plugin. I've been making all sorts of weird-ass Stealth skins I'll never use. Rainbows, smiley faces, bright white, "random" colors, rainbow, a freaking Stealth Black Hand Skin skin. . . I've been making all sorts of weird ones.

Translation time. I can actually handle this.

"Well, i was in my Orca, scanning the target area i was defending/patrolling. I found this one guy 4 times when he was in a Stealth Tank. (Just because im a good player. ) It is at this time, that he says that i am cheating, even though i have Renguard running.

But that is incorrect, people cannot cheat with Renguard activated.  
So, i need a solution please, or..." He lost me after this.

I think, and mind you, I'm hoping he isn't saying this, but I think what he might be saying is this:  
"or i will start to cheat me too and that just with a Good Stheal Skin  
"Or I will start to cheat, and not just by using good Stealth Effect skins."

Or. . .

"Or I will start to cheat. Also, that's a good Stealth Effect skin.[In reference to my little blue skin.]"

Even I'm not sure which is more accurate. And I'm not just being an ass this time, either. I'm honestly confused!

Actually I found something that's pretty nasty, after getting my new video card I kept seeing a black flicker in certain areas. Well turns out whenever a sbh crosses where there is shade like near a tree it turns black as it runs through. Although I don't think it always happens. I'll see if I can get a screenshot of this, it's almost like cheating, but unintentional of course.

Just to help, I noticed that exact same thing on my new X800XL at full settings on C&C\_Hourglass.mix, GDI side, by the tree on the left side of the AGT. I haven't noticed it since, but then again, I haven't played that map that often since then, either

I skipped the last 30 posts so if i repeat what someone else has, sorry.

.dds or .tga skins are allowed in conjunction with RG. Just not when the server has enabled the pure function. However, these skins and textures hardly do anything for the player.

The sbh and stank skins (when modded) do hardly any help to the player using them. So if anyone was to be using a stealth hack it would be an objects.ddb file. So while using RG (most people) cannot use the cheat/hack.

It is possible for RG to scan for just certain file names even if they are .dds or .tga, or even .wav... just requires a small change on the master server. Perhaps once I have completely finished the "w3d uploader" then we will be able to more efficiently approve those sorts of files which are not considered cheating.
