Is anyone else having trouble with Gmax 1.2? Each time I open it the program says that it appears to be corrupt. I've tried rebooting my computer and reinstalling Gmax, but nothing has worked.

I believe your installation file is corrupted. Try re-downloading it.

I didnt have any problems installing it --(However - i always remove the earlier installation of any program i have to avoid "bug" creep)i think this was more of a performance update - bug fix - then a new function upgrade...Oh - and they are offering "TurboSquid" -- allows you to share models...

I start up the material editor and I get a message saying that I need Macromedia Flash 5 player.
???
