## Subject: Exporting presets?

Is there a way to say... Export Presets, such as the Global Settings presets, then import them into another set and combine them with others.

I've tried doing Presets -> Export , It's exports it as presets.txt then I open up my other mod package and hit Presets -> Import and I select my Presets.txt but it doesn't import the presets.

Odd...I had a presets glitch where the default presets were gone! (Most of them, anyway)

Just go to your presets folder (#:/Programfiles/Renegadepublic tools/leveledit/presets), copy the conv10.cdb and the objects.ddb files from there into the presets folder in your mod package.
It will restore all renegade defualt presets.
