whats the model name for the humvee in reb? im wondering so i can create a devistating plot to ruin ren for other players...

sarcasm no i wouldnt..i compiled a cool ass humvee and want to test it
edit: found v_gdi_humvee.w3d

I don't think you can use custom vehicles online...

Oh you should have seen what i did not so long ago. Just for fun i decided to take a look into the vehicles and import one into RenX, I "shrank" the Orca into the size of a chicken and exported it into the game, surprisingly it worked, everything about the model. I though some original options would have been lost in the import but no.
