I've been searching a while for some GOOD weapon models/skins, but can't seem to find any that are any good. Does anyone know where I could find some GOOD ones? Like m16 or other real weapon models? Just wondering if theres anyone editing models for renegades weapons more than anything. Any links would be appreciated, of course.

No you did the right thing, its just that you can't join a pure server, but the only ones I have been on weren't pure. Considering I just did a check of servers that were and found none you shouldn't have any problem.
