uhm, FDS = free DEDICATED server

in other words, you cant make it non dedicated

if you are the first person to join an FDS server after it is started you must leave and re-join to fix the pending bug.

ok

well since its still not working totally i try to start the server and it works and all but the commands dont work... anyone have a solution for this? i start fds and all but the commands just dont work do i need to put any thing from the NR folder into the fds folder? help would be greatly appreciated.
