Hallo,

Ich dachte ich mach mal einen neuen thread auf, da der andere etwas übeladen mit sinnlosen Posts ist, die NICHT zum Thema gehören und NICHT helfen.

Ich denke ich weiß woran es liegt das Rnguard abstürtzt,
bei mir lag es an der Firewall, obwohl alles frei gegeben ist stürzt das ganze ab wenn die Firewall an ist, also kurz beenden und wieder an machen....

habe die Sygate Personal Firewall!!

Vielleicht haben andere Leute mit dem selben Problem die gleiche!

Vielleicht gibt es in der Sygate Firewall eine Option um den Crash zu vermeiden, wenn Ihrs findet schreibts hier rein!!!

Gruß Vercetti

  -- -----

I thougt to make a new thread course the old one is overloaded with things that DON'T matter, and DON'T help!!!

I think I've fixed the bufferoverrun error... I just shuted of my Firewall and it works....!!!!! It's true for me!!!

Just shut it down and when "Renguard" is on turn it back on!!

I got the Sygate Personal Firewall!!

Maybe others with the same Problem also have the Sygate Firewall

Maybe there is an option in Sygate to prevent this crash, if you finde it tell me so !!

Sygate firewall tends to fuck up at times. Then it just blocks about everything to go on the Internet and even by closing it down, everything stays fux0red.

I'd advice you to just use zonealarm . It does its job well.

I use Sygate & experience no problems with anything.

It worked fine for months for me but one day just decided to block all... Took me some days to find the problem =/.
