so, what error message do you get? does it startup at all?

we can't help you unless you tell us whats WRONG

so your clicking the original renegade link from the start menu, and nothing happens at all? It does not show up in the process list (alt-ctrl-del if you don't already know), or the taskbar?

Sometimes I get wierd crap like that. On my system, it's caused by Win16 subsystem failures which can only be fixed by a reboot. Have you rebooted recently?
