If you already have renguard installed, rename the game.exe to gamerg.exe just for now, then
take the game2.exe and rename to game.exe.

Download this: [http://beaconpedestal.com/nocd/djlaptop_renegade_1037_nocd.e xe](http://beaconpedestal.com/nocd/djlaptop_renegade_1037_nocd.exe) and install it.
Once installed, rename back to game2.exe and rename the gamerg.exe back to game.exe.

Although, if you dont have renguard installed already, simply running the NOCD patch i linked to
above will patch it before you install renguard.

<http://www.thekoss2.org/uploads> -> there you have a RG-approved no-cd crack with a little readme.txt that explains how to install...

You didnt need to do that. You could just've renamed game.exe (of the no-cd) to game2.exe, and replace the one in your folder.

Just a tip for next time... and for others that do not know..
