"[19:12] Your attempt to use the lan-exploit has been logged and will be reviewed."
I've gotten this message twice. It's disconnected me from the server both times. Im obviously not using any exploits(to my knowledge:/). I have no reason to. I would like to know why this keeps appearing though. Is it something im doing wrong? A problem with my connection maybe? Is this something i can fix?
 I would greatly appreciate any support.

Make sure you aren't logged into RenGuard on another computer.

Well, then, it's probably just a spurious message and you can just ignore it (unless Mac or Crimson says otherwise   )

Just ignore it, it's aBug in RG1.03

I had it several times too and I have only 1 comp.
