Lately when i play renegade online with RG, i have been getting kicked off renegade. Not by servers, not by hosts but by RG! I play and then for no reason at all my renegade shuts down and RG tells me that i had left that server... BUT I DIDNT! It seems to think that im quitting the game.

Does any 1 know whats going on with this?

I've had this too, seems like Renegade crashes. Donno if it would be a result of RG loosing connection or something?
