CnR Easy Kill!!!

1.) Join a CnR (C&R) server and be a pow.

2.) You obviously have no c4 right now, so aim at the gaurds head.

3.) Talk to them about something, take out your gun (hopefully a sniper) and shoot them.

Tough luck on how to get back to your base though... I would go through tunnels and hide, then go to your base.

If there jumping around then dont try to do that trick on them, they'll probably get you first.

Do you mean to imply that if you aim for the head you can get headshots? Holy fuckin' batman! Here I've been playing renegade shooting at their foots thinking, "why am I not getting headshots?"

takes notes

Oh, and excuse me for not playing kid mods

Leave him alone. Some Cops And Robbers servers require you dont get headshots during the actual battle. Its pretty much infantry only and ctf mixed together. Some like it, some dont.

Hey AADude your tip basically says have them stop to type something to give yourself enough time to whip out the sniper rifle and get a quick headshot. That's cheap. But..

something you probably know about but haven't considered in this situation. most people's pings in those games are between the 200-300 mark. meaning there is a slight delay in everything that happens on your screen i.e. you see things that already happened a split second ago. when you

pull out your gun and shoot, their screen might just be showing you having just pulled out the gun. so technically if you are the 'guard' in the C&R game you don't see the prisoner pull out his gun till (on his screen) he is clicking to shoot you. And even if you react and dodge he'll probably kill you and you'll see your guy slide along the floor to where you were just standing.
