... I wasn't. Blockbusters across North America as well as most electronic stores (eg Future Shop) stop carrying it due to the downloadable content. Now with this ed. we start carrying it and that means I can rent it.

Do you have a game controller? Keyboards suck for those types in my opinion.

Its a dumpy one. The D-Pad won't seem to configure with many games.

Huh...the only control problems I had with the PC version were related to the flying controls...I had to remap a number of things so I could play on my laptop. But I've been playing GTA on PC since GTAIII, so I guess I'm just used to it.

I'd drop dead before I'd spend more money just to have the PC-PC version. Political bullshit does not figure into my gaming plans.
