The screenshot shows the GameSpy Arcade 2.0.3 interface. On the left, there's a sidebar with 'My Games' and 'Parlor Games' sections. The main area shows a list of servers for 'COMMAND & CONQUER RENEGADE'. A modal window titled 'Blackhand Studios Core Patch Downloader' is open, displaying the 'Core Patch 1 Introduction' and a progress bar. The progress bar is at 73/73 serv. Below the progress bar, there's an 'Install Core Patch' button, which is highlighted with a red arrow. To the right of the button, a message says 'Failed: 416 Requested Range Not Satisfiable' and 'Check network connections, close the program and try again'. A red arrow points to this message. The bottom of the window has checkboxes for 'Hide Dimmed' and 'Cursor Highlight', and buttons for 'Delete' and 'Hide'. The taskbar at the bottom shows the 'start' button, the 'GameSpy Arcade 2.0...' icon, and the 'download' icon.
