I Havent been able to see any servers since XWIS took over WOL, I am able to logon and talk to buddies and see that they are on games but i cannot see any servers even when i refresh. I am also using the XCC WOI IRC client.  
Please Help.....

XWIS hasn't taken over yet as far as I know. You can connect to XWIS with the client, but EA hasn't redirected WOL yet.

If I've understood at all, not seeing servers on XWIS is caused by wrong password.

I dont think it is the password, cause i can log on fine, and i can't find anywhere else for a password to go.

To the best of my knowledge, XWIS has not yet taken over WOL.

In any case, the fact that you are using the XCC program to connect indicates that you are using XWIS. If you do not see any servers, then close Renegade and launch it again. Log into WOL and this time, pay attention to the MOTD. If your password is incorrect, you will be notified in the MOTD window instead of an invalid login dialog.

Let us know once you've verified that your password is correct or not.

If someone else already took your name, then you'll get just an empty list. Try logging in with another name.
