Ok, Im making a first test level with heigthfield, and it wont export- I extracted the W3d's and some official ones into my mods level directory. I click export, and it just jams with the great ol time thing, and I ctrl+alt+delete is says not responding. When I goto renegade, it shows up, but when I select it and click *go* i think)) and it just shuts down completely. What's wrong?(yes thats right, I finally am trying to mod like ACK said I should)
