heres a ss of wat i get when i run rg...

as you can see...something is seriously wrong with it.....when i join game, i get the usual blue rg message and the "u have connected to a rg protected server", i can also use the commands that are available only to rg players, but when i check myself for rg with "!rg chaos", it says that im not using rg...and for some reason..my advanced repair gun repairs slower than engineer speed when used on buildings but can remove c4 in like 2 seconds.....

That error was due to a problem on my server. It's fixed now.
