About one month ago i try to run Rene and i got this msg:

Error: loader couldn't initialize service!

Then i try to unistall my norton, rene and rg and i got same problem... So today i totally unistall norton as many say thats the problem and now i run AVG7 and then again i totally unistall evreything and give it a fresh install from 0 and now i get the exact same msg!

And i mean please help me out here... with no RG i cant play ANYEHERE even if i run RG i still get accused... at least this can prove something?... o\_O

Thx,  
ZeeLd

You need to reinstall RenGuard... Norton probably removed a vital RenGuard file (svkp.sys).

Read: [http://www.renegadewiki.com/index.php?title=RenGuard\\_SVKP\\_Is\\_sue\\_for\\_full\\_details](http://www.renegadewiki.com/index.php?title=RenGuard_SVKP_Is_sue_for_full_details).

But see i think my problem is different... i dont have norton no more... and im using AVG7 . Now i totally removed evreything + the AVG7 and install only Renegade and try it... works then i install rg and try to load and i get same error msg... and i dont have ANY anti-virus installed right now... so i dont know what the problem is... O\_o

Try this;

Uninstalling RenGuard and SVKP:

Use RenGuard's installer -- if you do not have it, then re-download it from [www.renguard.com](http://www.renguard.com)!

Click Start -> Run and type in "regedit" to open Registry Edit.

Remove the registry key HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Services\SVKP.

If you can, remove the registry key

HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Enum\Root\LEGACY SVKP. If you cannot remove this one, then don't worry about it... move on.

Close RegEdit

Reinstall RenGuard (which will also reinstall SVKP)

Thx for your replay here is what i did...

\*Remove RG

\*Click Start -> Run and type in "regedit" to open Registry Edit.

\*Remove the registry key HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Services\SVKP.

Was not able to remove this one!

\*If you can, remove the registry key

HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\Enum\Root\LEGACY SVKP. If you cannot remove this one, then don't worry about it... move on.

\*Close RegEdit

\*Reinstall RenGuard (which will also reinstall SVKP)

And i try to run it and the exact same error!... And no i do NOT have ANY kind of anti-virus or firewall as i was doing this... Do i need to reboot? Or does not matter?... man this is wierd... im the only one having this problem??
