I'm so mad right now, my mom gives me time limits for playing on my computer and I waisted it trying to look for a way I can turn RenGuard on.

Some stupid idiots accused me of cheating in the Jelly-Server and I was kicked out becasue of it. They really made me so mad, now I need to turn it on but I dont know how.

What is the icon? Where is it located?

Yes I did DownLoad it..

When you install RenGuard it is automatically started when you launch Renegade (using the same icons/method that you always use).
