Sometimes I get the urge to play the SP missions for Renegade which don't require RenGuard since I'm not playing online. Anywho...If you have RG installed and open up Renegade just to play the SP missions you still have to go through RenGuard. Sometimes RG does not work and I have to un-install RG just to play the SP missions. Is this something to be considered in a future patch w/o having to go through RG? Maybe another Game.exe file just for SP missions only w/o RG?

Uh, game2.exe?

It's already there. RenGuard just renames your original game.exe game2.exe, so just start that and you'll not be running RG.
