The .lvl file for the map CnC_FieldTS.mix has never been released. Until now...
AircraftKiller made this map and after formatting his hard-drive he lost it forever.

Well as part of the core-patch 2 map fixes I have had to remake the .lvl file for this map, and
seeing as I have now completed the fixes for this map I thought I might aswell release it.. I have
included one small addition to the map.. I have removed the ability to get into the tunnels with a
Nod buggy. I have also fixed a weird lag area between the obilsk and the strip tower, and I fixed
the glitch where sometimes buying a flame tank doesn't deliver.

So here is a screen-shot, and a link to the file, it includes all the way-paths, controllers, crate
spawners, purchase terminals and other neccessary presets. The start-up spawners and crate
spawns are as close to the original file as possible. Enjoy

.lvl file for the map CnC_FieldTS.mix

obilsk and the strip tower
I was wondering what the hell that was. Made a few people leave the game because of it.

Again, good job Reborn!

I hope to see CP2 released soon

Wasn't FieldTS released before I started playing Reengade online in August 2003?
