I was on a half RG server with my brother. We connect through the same router/modem. When the game was over I quit by pressing esc, my bro continued playing.

When I looked at the RG window it displayed the following messege:

Quote:[14:24] Your attempt to use the lan-exploit has been logged and will be reviewed.

What is this about? I never cheated nore would I ever try it. ESPECIALY NOT WITH RG RUNNING!!

Is this a glitch? Mistake?

Am I in trouble? (I could just rejoin the same minute tho..)
