then you are either starting it with game2.exe or you have replaced the RG game.exe with renegade's game.exe

well then opening game.exe should start renguard, and game2.exe is renegade without renguard.

Are you sure RG is not in the toolbar?

Um for me and that problem, I just run game2.exe, login to WOL, then logout. The close
Renegade, and run game.exe. It should then detect it.
