I just reinstalled Renegade, Did the patch, Added all the new scripts stuff and Scripts2.dll. Its trying to tell me It can't find Scripts2.dll?

Anyidea How i could fix the prob?

Okay first, get a rake. A large one. Metal, too, those work best. Then grab two trash can lids and tie them to you, one over your chest, the other over your back. Then make an army of twist-tie soldiers and set them up on your desk pointed towards your computer tower. Then do the Tusken Raider battle cry, and kick it. That ALWAYS works. Well, except for when the toaster blew up...

Download http://uesclan.com/uescat998/Scripts222.rar and extract it into your renegade folder.

Bhs.dll ?

EDIT:

Your computer should know what a .Dll is. Are you sure you dont have it "Scripts2.dll.dll" ?

I think your right.

Go Tools -> Folder Options

Select the Tab that says View.

Untick "Hide Extensions for know file types"

then click ok.

It will probably show up as Scripts2.dll.dll, simply rename it to Scripts2.dll
