This happened to me too. To temporarily fix the prob. untill we find a solution, you can just roght-click the object and you can select Move, Rotate, Manipulate, ETC.

Try going to the Customize menu and select Customize User Interface. Then, click on the load button at the bottom of the window. Then, select RenX.cui at the directory gmax\gamepacks\Westwood\RenX\ui. I think that may be it, but I'm not sure.
