You are absolutely NOT allowed to run bots on XWIS/WOL. If you do so, your serial number will be banned.

Ugh, I should have noticed that... I am always reversing names that look weird to see if that's what they are.

Anyway, cipon is banned and nopic has had his ban extended for another month.

Rofl, he's at it again.

I can tell you EXACTLY why he posted asking this.

History:

Back when WOL was around, and there was no rule against bots, Quadra00 and a few others started making a bot that came to be known as CFGuard.

It was a mix of NGSGuard, CloudyServ and an IRCBot, and we had permission to use all 3.

The bot never got off the ground, but we did get a basic one going. It used a bot connection to use commands like !locate, !gi, !ip etc.

We put this version, which can only be described as a buggy beta up for download. nopic downloaded it, and went about renaming it to N-bot.

I can guarantee you it was a rip, because all the files were the same, just renamed, and my code and a couple of comment lines were left in.

Anyway, thats the history, now for the present:

nopic has teamed up with AmunRa, Dave4989 and sh0ck (and others)to form RenegadeX. (<http://www.amunra.net/renegadex/>) We know they (well, at least nopic) have re-ripped the bot, and are now calling it AG-REG. How do we know this? They joined our IRC network and tried hosting the bot there. It doesn't take any time for a creator to recognise his creation.

However, what nopic has just realised is that he needs to make the bot connection for that older version to work, which he obviously isn't smart enough to do. He is not "making a bot", he is trying to get a bot he ripped and has little idea about to work on XWIS.

Thankyou to all those who recognised this for what it really is and took swift action.

And what light said is right =)

Hi2u nopic, so good of you to post here and stupidly put your name backwards ROFL. Oh man...
Funny stuff...

And I was just talking to light about this too that I bet the commands dont work since he cant connect it to XWIS. Guess what, he comes crying back here to look for the WOL con script cause why? HE CANT MAKE IT ON HIS OWN ROFL.

Nopic, do yourself a favor and stop ripping k tnx. Its people like you that make bot makers not want to release their work. And for this reason is why I halted the better version of CFGuard and only keeping it private.

name backwards, rofl, man thats a good catch...

and blazer has gotten the right word for this "OWNT"

it is true, many scripts wont be released because of people like him (including my bots =S).

then he comes back and sends me N-Bot im like WTF is this...

He sed it was his bot that he made then he told me that he is a really good scriptor so he edited everything from (N-Bot) to (AG-REG) and I did not know that is was Quad's bot in the N-Bot config it sed

;Thanks for using N-Bot created by Nopic01.

So thats what happend with the problem just wanted to sum it up.... and snipgod dont talk bout my parents k, thx.

You have real balls to show yourself lol.

Then why did you say "I made it" that states that you actually made the bot. Contradicting yourself now I see?

Even I didnt really say "I made the bot" in the code, I gave credit to the people who worked with me to make it possible. Look at your history sh0ck, lies lies and more lies. And your just as dumb as nopic. Nopic just needs a brain to get it to his head HE CANT MAKE ANYTHING except bypass RG and getting caught.

I told you numerous times sh0ck, lies will get you no where. It will just make you look more stupid.

Please lets not drag this on.

I would like an assurance that you will not use this bot under a false name. You may contact me to download the original bot, with it's original name and thankyou credits if you wish.

However, without the ability to make it work correctly, I doubt it will be of little use to you.

I hope this reflects to you nopics true character. He knows what he does isn't right. Here is the first time he tried to get help ripping our bot:

http://www.renegadeforums.com/index.php?t=msg&goto=15686_2&rid=4039#msg_156862

Neither attempts have worked, but I have no doubt he will try for a third

I too think nopic is a fucking idiot

sh0ck I also disagree with, totally not on their side, Dave agrees with me, they are beginning to be VERY troublesome, they are both now glined
