Ok...
Everytime when i want to start renguard either by using the startup menu or pressing game.exe ,
it always pop up a box saying "Error:loader couldn't initialize service!"
and nothing will start.
I can still play the game by pressing game2.exe though.
I 've also tried to reinstall renguard and the whole renegade.
But it still doesn't work.
I am using windows XP.
thank you very much for help.

If you want to play renegade without RenGuard on, then open C:\westwood\renegade\game2.ex.
RenGuard 1.04 will be released soon that will fix the Buffer Overrun problem.

Check your firewall isn't blocking renguard from connecting.
