[00:50] WARNING: Model Textures (Skins) have been detected on your client! You will not be able to join a pure server.
is what comes up everytime i enter any server...

then my FPS decreases to under 20...my cpu is damn g00d and my connection is fast...ever since that error appeared its been really slow bcuz of the low FPS...i am not useing a aimbot as my friend suggested was the problem....ne1 know what the problem cud be?

Skins are normally not a cause for any FPS-problems. try playing with game2.exe and check if you still have the problems. If yes, then it's a problem related to RG.

Try deleting your skins from the renegade data directory and check if you still have it. If no, then it was a problem with your skins.

I got this problem with FPS sometimes, and this can be fixed by shutting Renegade down and starting it again...

but I don't have any troubles with skins I 've made...

Try disabling the RenGuard sounds in the options.
