Hi , i seen alot of apache/orca/trans heli's die cuz of some nub driving into it by accident and causing it to flip...

is there a fix for that cuz its GODDAMN annoying

it just happend to me twice in a row tbh...

This is indeed very annoying. Sometimes you just CAN'T get to it fast enough. This is more of a Nod problem (Air Strip) but happens sometimes as GDI as well...

But, I doubt anything can be done...
