I stumbled upon something rather "interesting" when I was looking at some old media on the good old Westwood FTP.

`ftp://ftp.westwood.com/pub/renegade/previews/video/REN02.MPG`

Look at Havoc's pistol in the cargo plane scene (right after the Hand of Nod is shown).

Has anyone else noticed this before?

I always knew about that but I never said anything. I've known about it before I even had Renegade.

Ha! That cracked me up.

To me, the weapons in that trailer look better than the actual ingame ones.

I tried to take picture of the pistol in the movie with my camera, from my LCD screen laptop, but everi time I take picture, it shouws only as a bright light for some reason. Looks like I will have to adjust my camera somehow (and do what I don't do much: read instructions)

Use fraps or something similar.

The full version is better

Got to love getting something for nothing.

Or you could just search Microsoft.com for Windows Media Encoder. It does pretty much the same thing, though about 10 people are going to go "Oh no way I'm not going to get anything from Microsoft."

No, that is the same rifle. It was just skinned (textured for you who can't accept different names)

differently. I guess they reskinned it for a more Nod look (All their stuff is red, after all).

Quote:It was just textured (skinned for you who can't accept proper terminology) differently.

Fixed to correct idiocy inherent in the above post.

DJM wrote on Sun, 15 January 2006 18:56The full version is better

Got to love getting something for nothing.

What do you mean getting something for nothing? You gave me a name of program that I have use for, and I (unlike some other people) was smart enough to find it on the web.

And yes, full version is probably better, but you have to pay for it and I don't have Visa card.

Oh, I thought DJM was talking about.... ah, never mind. Disregard my previous post

Anyway, I think Fraps(just like any other program) probably needs a serial number that you can probably get from kazaa.

Lmao, yeah run any program you get from kazaa that has the word "keygen", "crack", or "fix" in the title.

Matter of fact, download like ten of them, goto the directory, Ctr+A, then press enter.

When you reinstall windows come back and tell us how it went.

[View Forum Message](#) <> [Reply to Message](#)

I never said I was going to download anything like that. I just said where DJM probably got the serial for Fraps. Anyway, you are right, Kazaa is full of viruses(Not that have gotten one from it, because I don't use it much), but it can be a good source of programs.

Somebody in my clan bought the full version and gave me a copy.

Beleive it or not, I'm not stupid enough to download exes off kazaa/limewire/whatever.
