The Renegade Mod art pack has some trees in it. 3 i think, 1 oak, 1 pine and one ??tree. you have to take the animation bones off though.goto ftp://ftp.westwood.com/pub/renegade and look for the Modart pack

i would like to know if anybody has any temprate trees i oculd get my hands on for my map. It is basically done except for trees and the gdi base controllers. I could proolly make them myself, but i need the map done by friday evening..so i'm short on time. A link would be really really nice. (Would also be kewl if you could blow them down)
