Noone here uses your computer, neither does any of us have a keylogger installed on your PC to know where the hell YOU installed. Oh, and we can't read your mind either for the past...

Default installation folder should be C:\Westwood\RenegadeFDS\Server

Correct me if I am wrong.

But how do you search for that?

Subject: Re: where is the FDS server file thing

Search for the Keywords "RenegadeFDS" or "server.dat". This should help. You can even search with "Renegade" and will get the startmenu folder with the Link to the Renegadeserver.exe in it as result. Then you have to take a look at the properties of this Link and will find out where it is linking to.
