havocide3 wrote on Fri, 20 January 2006 17:46can't because of Plesk  
Well if you can't remove it, at least make sure it doesn't conflict with the Brenbot.exe file.

I'm a nub with servers... any way you can just explain it for me  
EDIT: as in make it so it doesn't interfere.

Uninstall your existing perl and install the right version of perl that works with Brenbot:  
ActivePerl-5.8.6 build 811. This should fix it.

If you aren't using perl, rename c:\perl to c:\perlx .
