A while ago, somebody had released a pack of simplified building models for people who were building maps but didn't want to stick the regular buildings on the map until they had a good place to put them. Does anyone know where to find it?

Those are so useless. Why not just place the buildings there anyway, without welding them to the terrain, then change them around when you find a good spot for them?

I'll do it when I get more of the map done. I just don't want to have to deal with more junk in gmax than I'm already dealing with until I get the basic base areas done.
