---

when i press FDS connect i get this error  
pls tell me how 2 fix so i can get my server working

See the end of this message for details on invoking  
just-in-time (JIT) debugging instead of this dialog box.

-----  
\*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just in time (JIT) debugging, the config file for this application or machine (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the machine rather than being handled by this dialog.

I assume you are talking about BR.net  
  
Tell Dante that he cant parse String to Double

---

Apparently, BR.NET expected a String value to be parsable into a number and it got a null string instead
