It's the most recent public release.

However I heard Mac gave some server owner a updated version before he done the offski. But that could just be rumour. Even if it is true i wouldn't know who had it.

Have gave it to me, but some commands werent working and
it wasnt good for server hosting, because it wasnt stable.

Umm, no. Get your facts straight. 1.42/1.43 was never finished and it is not certainly crap.

What is the difference between "in progress" and "not finished"? And yes though I'm not by any means insulting your work the stage 1.43 is at it is shit. It's what we run on the n00bstories server ... there is a reason Crimson is creating her own bot to replace it.

Contact Packhunter, he's finishing Mac's work on the new Brenbot version. But I guess CP2 will ship before that's finished.
