What did I do?

Insert CD 1.
Install Renegade.
Update Renegade.
Install RenGuard
Install GameSpy
Clicked a server.

What happened?

I joined the Server.
I got 3 messages: You Need RenGuard To Play On This Server.
And then: You have been kicked from this server.

Hmm?
Whats wrong?
I have RenGuard, Yet... It says I dont?
Wth?

Check in GSA if the path to your Renegade EXE file is correct. For using RG, it must be set to
....game.exe

The first time u log in after installing RG, RG doesn't know your name yet. Log in with your name,
log out, restart.
