Hello, i just reinstalled rengaurd cause it wastnt working, and when i reinstalled it (uninstalled then reinstalled) it wanted to download cp2, i said yes and about 1/3 through the big download it stopped and crashed on me, now it opens rengaurd with white screen, and after 1 minute windows closes it cause program not responding.

if anyone has any ideas please respond, (a cp2 update that i dont have to do through the renguard program would be nice)

i have had the basic problem before of renguard crashing like this (y i reinstalled) but this time it was plainly because of cp2 download

Blackhand Studios Core Patch Downloader

Core Patch 2 Introduction

From the Creators of RenGuard, Blackhand Studios(tm) proudly presents "Core Patch Two". CP2 is the latest in a string of unofficial C&C Renegade updates which fix several bugs identified in the game and add new, exciting features and the very best in fan-made maps.

Four excellent maps, C&C_BunkersTS, C&C_Last_Stand, C&C_Terrace, and C&C_Tropics are all available through this update. We encourage all players to try out these new maps.

General Features:

- The faster map loading enjoyed with Core Patch 1 has been made even faster in this patch.
- Version 2.2.1 of the custom scripts.dll by "jonwil"
- The font change inadvertently introduced, and the custom loadscreen in CP1 has been revoked, restoring the Renegade defaults.

Look in your renegade folder and delete cp2.zip or patchall.zip if they exist.

Then try again and see what happens.

ok, i tried that and it didnt work, so i reinstalled again (3rd time now?) and now it comes up fine and starts to install cp2 again.

just in case, this time i have firefox prepped to manually download the file patchall from <http://download.renguard.com/cp2/patchall.zip>

if it doesnt work this time around.

if it does fail, can i install cp2 from the patchall.zip file anyway, or is it a waste of time to download if not through renguard?

EDIT: i did check the file sizes, i had 20 megs of the 54 meg file downloaded when it crashed, so since i have dsl not cable that is a lot of time downloading to have just crash

If you download the full patchall.zip and put it in the renegade folder alongside download.exe and then run RenGuard, it should pick the full file up without downloading it again.
