Installed Cp2 then went to play a few games today. First game I noticed something odd, when I went to crouch I ended up giving the finger, tried the alternat crouch key and I took a bow. Then the next map loaded and I see this.

I know it's not my vicard, because everything worked fine before installing cp2. I had the "old file not found" error with the instructions it loaded just fine.

Try deleting all the *.thu files from your renegade data folder.
Other than that I dont know what could cause this.

run keycfg.exe in your Renegade directory to fix the problems with unable to crouch, etc

Found the kecfg thingy and the thu deletion fixed the problem.
