can some one help me to fix this problem? after i start rengaurd it says:

a buffer overrun has been detected with has corrupted the programs internal state.The program
cannot safely continue execution and now must be terminated

i attached a pic of the error message

File Attachments
1) error.jpg, downloaded 129 times

Microsoft Visual C++ Runtime Library

Buffer overrun detected!

Program: E:\Program Files\Westwood\Renegade\Game.exe

A buffer overrun has been detected which has corrupted the program's
internal state. The program cannot safely continue execution and must
now be terminated.

OK

and just to let you know, i found some one's topic that was about his game.exe, so i downloaded
it(the no cd for rengard) and it still didnt work, it gives me the same error, and the only way i found
to play the game was to open the game.exe with out clicking on rengard, but when i play games it
says i could be cheating

If you are running Windows 2000, you'll have to either wait for RenGuard 1.04, or you will have to
upgrade to Windows 2003 or Windows XP.

I suggest the latter.

If you are not running Windows 2000, then do please tell.
