Great site, lots of tutorials.
You need gMax too.
Get it from www.planetcnc.com together with the getaround patch.

RenHelp is our best website for anything so far. However our main domain has been down for a week now. This URL will mirror you: <http://renhelp.laeubi-soft.de>

Getting the word out.

The best place to get the scripts from is <http://www.sourceforge.net/projects/rentools/>
It is best to have the latest version installed (to pick up bug-fixes that are in it)

Also, people working with leveledit might want <http://users.tpgi.com.au/adsloptd/LevelEdit.zip>
which is my version of leveledit that fixes a number of bugs (for example, it now loads always2.dat properly and it reads scripts.dll from the renegade folder, not the mod package)
