Can you post a screenshot of it saying this and explain exactly when it says it (when clicking the link,when clicking "renegade"-button on renguard, ...).

Same problem 2 me...

It appears if you hit the "Renegade" Button on rengaurd or just start the game.2exe

Appears after i copy my whole renegega folder to my new PC (Cause i can't find my renegade cd)

Renegade installation doesn't just install the files, it also installs a lot of registry values that you didn't get if you just copy-pasted. the game will not work if u do this.

Buy the game, it'll cost u 5-10 €/\$.

Also extract the Registry inf. nothing changes...there is a "PAth" value... changed it to the new path... and same problem....damm it...
