In level edit, in the global setting, purchase options, there is an equipment file for each team. It has no objects in it by default. I added something to it but how do i access it in the game?? Its really annoying me because i need to use this in my mod (Tiberium Desolation).

Dunno. It may have been something they were going to make but then were rushed and didn't finish it. The only way i know to buy equipment is with the one you use to purchase a beacon, but sadly that's only one tab.

I was thinking of doing that... but how do you link a tab to a section? is it possible to do it through level edit?
