I have recently made a co-op mod. But i can't seem to make it serverside. However, my new spawnpoints, and PT's are visible. But other things such as weapon spawn dont appear, and along with some things i deleted from the original map. but appear when server is loaded.

Can somone jsut tell me how to make my mod serverside?

Thanks

Well for the weapon spawn part, did you remember to check the box in the game options on whether you want guns to be spawnable or not?
